EDUCATION

G.C.E. Advanced Level (Technology stream)
- Engineering Technology: C
- Science for Technology: S
- Information and Communications Technology: C

Professional Diploma in Software Engineering
Java Institute for Advanced Technology (UK Award), FQ-UK
10/2023 – 10/2024

Professional Higher Diploma in Software Engineering
Java Institute for Advanced Technology (UK Award), FQ-UK
03/2025 – 02/2026

Advanced Diploma in Software Engineering II
Java Institute for Advanced Technology (UK Award), FQ-UK
05/2026 – 04/2027 (Ongoing)

BEng in Software Engineering
JIAT (IIC University)
04/2023 – 2027 (Expected)

PROJECTS

GlobalTrade Supply Chain System BCD II academic project
Purpose: A web system to manage the supply chain work of a logistics company: shipments, vendors, inventory, orders, routes and customs documents.
Key features:
- Designed the MySQL database (Shipment, Vendor, Inventory, Order, Route, Customs Document, User/Role).
- Used EJB timers, interceptors, transactions and role-based access control.
- Built the web layer with JSP/JSTL and the business layer with EJB (MVC-style structure); deployed on Payara 6.

Technologies: *Java 17, Jakarta EE, EJB, JSP/JSTL, Bootstrap, MySQL, Payara 6, Maven*

Toucan Hobby Android app | Final project, Handheld Device Programming II
Purpose: An Android shopping app for RC hobby products, so customers can browse and buy on their phone.
Key features:
- User login with Firebase Authentication; product, category and order data stored in Firestore.
- Product browsing, cart and order flow, user profile and event screens.
- Payment gateway integration; Map API and phone sensors.

Technologies: *Java, Android SDK, Firebase Authentication, Firestore, Map API, Payment gateway*

AgroLink Android apps
Purpose: Help farmers sell their products directly to customers, without a middle man.
Key features:
- Two separate Android apps: a farmer app and a customer app.

Technologies: *Android, Java, Firebase*

ModernShoes Web application
Purpose: An online store to sell shoes.
Key features:
- Back end built with Java EE using the MVC pattern; data stored in a MySQL database.
- Front end built with HTML, CSS and JavaScript.

Technologies: *Java EE, MySQL, HTML, CSS, JavaScript*

Tuition Management System Desktop application
Purpose: Manage the daily work of a tuition center in one application.
Key features:
- Designed the MySQL database using an ER diagram.
- Built with object-oriented Java 17; source code managed with Git and GitHub.

Technologies: *Java 17 SE, MySQL, NetBeans, Git, GitHub*

Driver Monitoring System IoT prototype
Purpose: Show the driver's state with LED lights, to help detect tired or distracted driving.
Key features:
- A camera checks the driver's face and eyes (Python and MediaPipe).
- The ESP32 shows the state: green = normal, blue = eyes glancing aside, yellow = looking away, red = eyes closed.

Technologies: *Python, MediaPipe, ESP32-S3, LED indicators*

SUMMARY

Software Engineering undergraduate who builds web, Android and desktop applications with Java, Jakarta EE and MySQL. I have completed academic and personal projects, including a supply chain web system, Android apps and an IoT driver monitoring system. I am looking for a Junior Full-Stack Developer or Software Engineer role (internship or entry-level).

SKILLS

Backend
Java EE | Jakarta EE | Servlets | JSP | JSTL | EJB | Maven | PHP

Frontend
HTML5 | CSS3 | Bootstrap | JavaScript

Mobile
Android (Java) | React Native | Payment Gateway | Map API

Databases
MySQL | Database Design | Firebase Authentication | Firestore

Tools
Git Version Control | GitHub | NetBeans | VS Code | Android Studio | MySQL Workbench | Payara 6

IoT
ESP32 | Arduino IDE

Concepts
Object-Oriented Programming | MVC Architecture | Java Design Patterns | ER diagrams

LANGUAGES

Intermediate

AWARDS

JIAT Level 5 Awards (19/08/2026)
9 units, including Handheld Device Programming I, Web Component Development I and II, Web Programming II, and Object Oriented Design Patterns I.

JIAT Level 4 Awards (21/08/2026)
10 units, including Software Application Development, Software Project, Database Management System 1, and Web Programming 1.
